

REHEATING INSTRUCTIONS HOLIDAY DINNER MENU

Most dishes reheat best and retain their quality better using a conventional oven. The times provided are guidelines, and may vary with each home oven. Suggested reheating times may need to be increased if reheating either multiple dishes simultaneously or large quantities. Bulk items will reheat more evenly if they are in a single layer.

For best results, allow tray of food to sit out for no longer than 3 hours to reach room temperature before reheating.
